Centennial, CO
chrisetges.me/

Long time technology hobbyist and physiology graduate seeking full-time development position. Experienced in HTML5, CSS3, Javascript, React, jQuery, RESTful APIs, node.js, MySQL, MongoDB/Mongoose, Express, and HandlebarsJS. Years of problem solving experience as a licensed optician in the healthcare field.

Applications Built

YEARBOOK()

- ▶ A networking/social platform for developers. Allows user to create a public profile page to display their portfolios, projects, interests, and job-searching tools.
- ▶ Built with React for front-end, Express/Node for backend with a Mongo db with user authentication done with Passportjs
- ▶ <https://aviato-yearbook.herokuapp.com/>

GO FOOD YOURSELF

- ▶ An application to help you decide what to cook with the ingredients laying around your house
- ▶ Uses a mySQL database built with Sequelize to store ingredients and run queries. Front-end UI built with JS/jQuery/Materialize, with Node/Express building out the backend
- ▶ <https://go-food-yourself.herokuapp.com/>

NITEOWL NIGHT PLANNER

- ▶ A wizard-style event planner based on a user's locations. Uses multiple APIs to pull local restaurant, brewery, and movie information. Used jQuery for DOM manipulation, materialize.css for CSS framework, and email.js for email templates, Ajax for API calls
- ▶ Lead Developer in a group of four, developed in approx. 2 weeks
- ▶ cetges86.github.io/NiteOwl-Night-Planner/

Relevant Work Experience

FREELANCE WEB DEVELOPER

AUG 2017 - PRESENT
